## A REVOLUTION IN AIR JET BATHS

BainUltra®, the pioneer and inventor of the air jet bath, presents its most recent technological innovation: Geysair™, revolutionizing hydro-thermo massage®!

### The perfect balance of water, air, and warmth

Geysair™ is a new hot air jet system that surrounds the bather in a cocoon of warmth. Like the hot steam that geysers shoot into the air, the air flow produced using Geysair technology remains warm until it comes into contact with the skin.

The sensation of coolness as dry air bubbles meet skin dissipates, and the water temperature remains constant so the bather experiences a blissfully relaxing experience.

### Technology, pure and simple

The operating principle behind Geysair is simple: it heats and humidifies the jets of air so they retain their warmth. Baths equipped with Geysair technology offer all the technical and therapeutic advantages that BainUltra® is known for. And the Geysair system always remains impeccably hygienic.

The Geysair system is installed in the air duct between the tub and the backflow prevention circuit. It consists of a faucet screen, current and temperature regulators, solenoid valve, and a heating element.

On a more practical side, Geysair uses 20 amps of electricity. Geysair use generates an electricity cost as low as 1.7¢ for a 20-minute session.

## **GEYSAIR™, A SOURCE OF WARMTH AND RELAXATION**

Inspired by the well-known therapeutic properties of hot thermal springs, Geysair™ delivers a true feeling of warmth when air bubbles touch the skin.

Surrounded by water, air, and warmth, you enjoy the full benefits of hydro-thermo massage®.

### Therapeutic benefits

- Deeper massage—from the epidermis down to the joints
- A massage that comes closest to the feeling of a hands-on massage
- A sensation of uniform warmth throughout the body
- Overall relaxation of body and mind
- Faster, longer-lasting muscle relaxation
- Comfort experienced from the start of the hydro-thermo massage session
- Enhanced absorption of minerals, essential oils, and other elements in the water
- Lymphatic drainage improved
- Skin more thoroughly cleansed
- Hydro-thermo massage session lasting as long as the user wishes since water temperature isn't a factor

# GEYSAIR™

With Geysair™, BainUltra® is perfecting the art of hydro-thermo massage®, demonstrating its commitment to improving relaxation, health, and wellness.

The new Geysair hot air jets system is raising the bar for the therapeutic bath industry by introducing a new technology to satisfy consumer expectations.

This brand new innovation is proving itself, taking its place as the pioneer in the world of air jet baths.

BainUltra stands out by providing a true feeling of a hands-on massage—The Best Massage a Bath Can Give®.
