**BAINULTRA**

Inspired by a centuries-old Milan opera house, the Scala therapeutic tub is a contemporary version of a traditional claw-foot unit. It has metal feet, an oval silhouette, and optional metal armrests. The tub measures 72 inches long and 42 inches wide. Feet and coordinating armrests are offered in eight finishes.

**MA/U STUDIO**

Exuding a crisp, industrial aesthetic, the R.I.G. module is designed for bathrooms with wall or island compositions. It features sinks made from precious stones and has an epoxy powder-coated steel frame and legs in a black finish. The module is shown here with 12-millimeter-thick Gris du Marais marble. **SMEG**

Building on its collaboration with Italian fashion duo Dolce & Gabbana, the brand recently introduced this special-edition range and hood. The fashion brand enlists artists to paint traditional imagery on appliances—in this case, a blue and white design that gives a nod to Italian majolica ceramic pottery.
