

BU-Touch

- Install the module BU-Touch at least 12 in. (30 cm) away from any metal part or metal foil.
- The BU-Touch module already installed on bathtub should not be relocalised.
- The antennas used for these modules must not be co-located or operating in conjunction with any other antenna or transmitter.
- To power the BU-Touch, only use the power supply unit provided with the BU-Touch.
- Never use an electronic device (cell phone, tablet, etc.) connected to an electrical outlet when you are in the tub.
- Supervision of children and anyone with physical, sensory or intellectual reduced abilities is recommended.
-  The product must be disposed of separately in accordance with the local waste disposal legislation in force.
- To satisfy FCC RF exposure requirements for mobile and base station transmission devices, a separation distance of 8 in. (20cm) or more should be maintained between the BU-Touch module and persons during operation.
- BU-Touch module for FCC (North America) models (915 MHz): Home and bathtub transmitter kit: 0608-521020, 0608-521023
-  **BU-Touch application**
Compatible with devices running :
iOs 9.0 or higher
Android 5.0 or higher
- **Router and installation requirements**
Any standard router with an available 100Mbps (wired LAN) RJ45 port can be used. The router must also have its Port 10022 open, which is normally a default setting. A 3-foot (0.9 m) Ethernet cable is included. The home transmitter will need a main supply (120V) nearby to allow connection of the transformer.
